## **SUPPLEMENTAL ACTION**

### ***Information Disclosure Statement***

1. Acknowledgment is made of applicant's Information Disclosure Statement (PTO-1449), which was received by the Office on April 24, 2006.

Applicant's cited prior art of Hampton et al (US 6,445,941) and Hoegnelid et al (US 5,480,420) patents were reviewed by the Examiner but found to be deficient. Hampton et al describes a device for measuring electrocardiograms (ECGs) of a mouse or rat using an array of non-invasive electrode pads. There is no teaching in the reference for using the device in combination with catheters that elute electrically-conductive fluid solutions. Conversely, Hoegnelid et al teaches the use of an implantable device with a catheter for eluting electrically-conductive fluid in a patient's heart, but fails to disclose the use of multiple catheters or of being used in combination with ECG monitoring circuits. Because of these deficiencies, neither reference appears to be combinable together or with the Examiner's previously cited reference of Prutchi (US 6,152,882).

### ***Allowable Subject Matter***

2. Claims 1-26 are still allowed.

### ***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carl H. Layno whose telephone number is (571) 272-4949. The examiner can normally be reached on 9/4/5.
